

## **School of Engineering Science**

Based on Osaka University Admission Policies, the School of Engineering Science seeks students who agree with its principles. The school welcomes:

- Individuals who got high scores in seven subjects in the examinations made by the National Center for University Entrance Examinations, especially mathematics, science, and foreign language.
- Individuals who possess knowledge and comprehension necessary for learning at the School of Engineering Science and are able to see things from a broad perspective and think logically and flexibly.
- Individuals who have deep interest in science and technology and are willing to open a new field aggressively.
- Individuals who are able to logically explain their ideas and discuss matters with persons possessing different opinions.

In order to select such students properly, in addition to the general screening, the school conducts various entrance examination procedures as noted below:

- Entrance Examination for Admission by Recommendation
- Entrance examinations for students joining the International Science Olympiad
- Entrance Examination for Applicants Graduating from Overseas High Schools
- Screening for privately-funded international students
- Special English Entrance Examinations for Chemistry/Biology Combined Major Program (undergraduate course)
- Entrance examination for third-year students entering from technical high schools
