

School of Engineering

Based on Osaka University Admission Policies, the School of Engineering seeks individuals who are deeply interested in the current situation and future of human society and are willing to face problems and solve them. The School of Engineering welcomes:

1. Individuals who acquired a broad understanding of senior high school learning content.
2. Individuals who logically understand the foundation of learning engineering — mathematics and science at senior high school.
3. Individuals possessing the power of expression to convey their ideas accurately.
4. Individuals who can actively engage themselves in challenges and discuss logically from a broad perspective.
5. Individuals who have basic communication skills.

In order to select students possessing above-mentioned qualities in entrance examinations on a multilateral scale, the school screens applicants through the two-step screening process noted below.

The school views applicants' scores in Japanese language, geography/history/civics, science, mathematics, foreign language, particularly noting those in science, mathematics, and foreign language on the examinations made by the National Center for University Entrance Examinations. In the Individual Achievement Examinations, the school notes their scores in mathematics, science, and English in the written exams.

Moreover, the school selects students by assessing above-mentioned requirements through the screening process and/or examinations noted below.

- Entrance examinations for students joining the International Science Olympiad
- Entrance examination for applicants graduating from overseas high schools
- Screening for privately-funded international students
- Special English Entrance Examinations for Chemistry/Biology Combined Major Program
- Entrance examination for third-year students entering from technical high schools
