

School of Pharmaceutical Sciences

Based on Osaka University Admission Policies, in order to nurture personnel who can contribute to society by working in various fields in the pharmaceutical sciences, the School of Pharmaceutical Sciences seeks students who have a wide range of basic knowledge enabling logical and flexible thinking, capable of playing an active role in everything with their rich creativity. Pharmaceutical Sciences is field of study directly related to life; thus, it goes without saying that persons possessing a sense of ethics and a well-rounded character are desired.

Currently, the Pharmaceutical Sciences at Osaka University has two courses: a four-year course at the Department of Pharmacy and a six-year course at the Department of Pharmaceutical Sciences. The Department of Pharmacy seeks students who want to dedicate themselves to studying life science, drug discovery science, and social pharmacy from perspective of basic pharmacy and contributing to health sciences and environmental pharmacy.

The Department of Pharmaceutical Sciences seeks students who understand the current situation and problems in medical care and will dedicate themselves to basic research and clinical research in order to solve such problems, and have a strong will to contribute to the development of medical pharmacy.

In order to select students worthy of receiving education to become personnel who can contribute to society, the Department of Pharmacy and Department of Pharmaceutical Sciences, following the examinations made by the National Center for University Entrance Examinations, conducts examinations in mathematics, science, and foreign language in the February Individual Achievement Examinations and a short essay and interview in the March Individual Achievement Examinations.
