

Graduate School of Engineering Science

Based on Osaka University Admission Policies, the doctor's course at the Graduate School of Engineering Science seeks students who share the school's principles. Ideal candidates:

- Possess expertise backed by basic knowledge while striving to open new areas of research
- Are able to explain their ideas and are able to engage in passionate and constructive discussions with many types of people
- Are willing and able to promote exchange with persons in other fields and countries

The school's basic principle regarding entrance examinations is to select outstanding persons possessing the above-mentioned qualities from Japan and abroad through a variety of methods. In order to select the most outstanding, in addition to general screening, the school conducts Admission by Recommendation, Screening for Working People, Entrance Examinations for Special English Courses, and Special Screening for international students.
