Message from the Executive Director

In 2013, the University of California Education Abroad Program (UCEAP) and Osaka University (OU) embarked on a shared journey of academic exchange and collaboration. In just these few years, hundreds of students from the nine undergraduate UC campuses have benefited from study abroad at Osaka University, and UCEAP has welcomed Osaka students to UC campuses across the state. As students travel both directions across the Pacific, not only do their academic skills and knowledge advance, but their appreciation of cultural uniqueness is enhanced as well.

A valued feature of the UCEAP-OU agreement is the provision of a Visiting Professorship, allowing a UC faculty member to teach at OU during the summer. In addition to enriching the local curriculum, this opportunity brings lasting benefit to the faculty member's home UC campus as he or she returns with new insights from his or her experiences at Osaka University.

We at UCEAP are grateful to Osaka University for its collaborative spirit, manifest in our joint UC/UCEAP office on the Toyonaka campus, and in the many forms of support that our faculty and students receive. In return, we welcome you to explore all that UCEAP has to offer. Come be part of the continuing UCEAP-Osaka University journey!

Vivian-Lee Nyitray
Associate Vice Provost/Executive Director
University of California Education Abroad Program

UC/UCEAP Osaka Office

On 3rd December 2014, the UC/UCEAP Osaka Office was opened in the Interdisciplinary Research Building on OU's Toyonaka campus. The office was established as a central base to enhance student exchange between UC and its partner universities in western Japan, including OU, to plan exchange programs, and organize lectures conducted by UC faculty for OU students.

Role and Purpose

- Enhancing student exchange between OU and UC
- Expanding existing OU student exchange programs
- Planning and implementing OU short-term programs for UC students
- Supporting UC students studying at OU
- Advising OU students interested in studying at UC
- Providing classes conducted in English, including intensive and special lectures by UC faculty to OU students
- Coordinating collaborative research and facilitating information exchange between UC and OU faculty members
- Planning and implementing international symposiums and workshops
- Enhancing student exchange between UC and its partner universities in western Japan, including OU

Lecture given by UC faculty at OU

Exchange Programs between UC and OU

Exchange Programs for OU students:

- Exchange programs based on university exchange agreements
- "US Training Course for Research and Presentation in Engineering and Science" at UC Davis, organized by the Graduate School of Engineering at OU (intended for STEM postgraduate students, held at UC Davis over the summer)

Exchange Programs for UC students:

- FrontierLab@OsakaU
- Maple
- J-ShIP
- FrontierLab@OsakaU Summer Program
- iExPO

Academic Exchange Agreements between UC and OU

Inter-University Agreements

- UC - OU
- UC Berkeley - OU
- UC San Diego - OU

Inter-Faculty Agreements

- Center for Research in Biological Systems, UC San Diego - Research Center for Ultra-High Voltage Electron Microscopy, OU
- Department of Mechanical and Aerospace Engineering, UC Los Angeles - Joining and Welding Research Institute, OU

More than 100 programs in the sciences, humanities, arts, social sciences, and natural resources.
