

# Science Seminar Bioethics and Research in Japan

The seminar explains in English the laws, regulations and ordinances governing genetic experiments conducted by researchers in Japan as well as obligations regarding to use of public research funds. In addition, rules for use of Genome Information Research Center of RIMD will be provided in English.

The science seminars held in English for members of IFReC and RIMD as well as for annual orientation are open to researchers in other departments at Osaka University.

Date: **14:30 - 16:30 April 23, 2018**

Venue: **Taniguchi Memorial Hall, 1st floor Integrated Life Science Building, Suita Campus**

*No pre-registration is required.*

- |             |  |
|-------------|--|
| 14:30-15:00 | <b>Guidance for laboratory biosafety according to infection diseases law</b><br><i>Professor Kazuhiro Suzuki (IFReC)</i>   |
| 15:00-15:40 | <b>Guidance for ethical guidelines and required procedures for medical and health research involving human subjects</b><br><i>Associate Professor Akihiko Takagi (IFReC)</i> |
| 15:50-16:10 | <b>Guidance for prevention of research misconduct and misuse of research funds</b><br><i>Associate Professor Jun Sakanoue (IFReC)</i>  |
| 16:10-16:30 | <b>Guidance to use Genome Information Research Center of RIMD</b><br><i>Dr John Rozewicki (IFReC/RIMD)</i>   |

The lectures will be done in English.

IFReC provides evidence that researchers from other departments have attended the guidance but whether that is recognized as taking training in the laws and regulations is determined by the director of the department the researcher is affiliated with.
