Osaka, Japan

Osaka is one of the biggest metropolitan areas in Japan and is the center of the Kansai region, which consists of Osaka, Kyoto, and several prefectures. Though the prefecture itself is the second smallest nationwide, it ranks third economically and has the third highest population. About nine percent of all foreign residents live in Osaka, and it is the second most popular destination to study abroad. Osaka is proud to host Expo 2025 Osaka, Kansai, Japan, under the theme; "Designing Future Society for Our Lives."

Osaka University

Located in northern Osaka, Osaka University has three campuses in the cities of Suita, Toyonaka, and Minoh. All are just outside the center of Osaka city, and offer easy access to Osaka (Itami) Airport and the bullet train at Shin-Osaka Station. We welcome researchers and students from around the globe to our 11 schools; 15 graduate schools; 25 research institutes, centers, and

facilities; four libraries; and two university hospitals. Under the motto of "Live Locally, Grow Globally," some of the most advanced research in the world is taking place here at the university. With so many cultures, backgrounds, and ways of thinking all in one place, Osaka University provides an enriching environment for people from all walks of life.

Campuses

Suita Campus

Suita campus is the largest of the three campuses, the headquarters of Osaka University, and is adjacent to the north edge of Expo '70 Commemorative Park. A large number of industry-university joint projects are conducted here, and it also houses numerous world-renowned research institutes, schools, and graduate schools in addition to two university hospitals. Based on the experience of the COVID-19 pandemic, a research center was established in April 2021 to amass knowledge and talent for the purpose of protecting our life and activity from the threat of infectious diseases.

Toyonaka Campus

The Main Library, the Museum of Osaka University, five schools, and seven graduate schools are located on our Toyonaka campus. It is always bustling with students and is considered our most lively campus. It is a great place to find friends and get in touch with the community. First and second-year undergraduate students spend most of their time on this campus studying general education at the Center for Education in Liberal Arts and Sciences, and a number of graduate students and researchers study and work at the numerous graduate schools and research institutes on the campus.

Minoh Campus

In April 2021, Minoh campus was moved to a new location directly connected to the new train station scheduled to open in 2024. It is home to 25 language departments in our School of Foreign Languages and is one of Japan's two national centers, a preparatory education institution for international students to learn Japanese. It is also open to the public and enables citizens to interact with our world and culture through the university's facilities. The International Studies Library of Osaka University, a new type of library integrated with the Minoh City Library, and a new student dormitory opened on the campus as well.

History

Osaka University's roots can be traced to Kaitokudo and Tekijuku, two academies that delivered front-line scholarship during the Edo period (1603-1867). This tradition is inherent in Osaka University today which continues to achieve cutting-edge research results worthy of international recognition and provide society with distinguished researchers and professionals.

1724 Kaitokudo

Kaitokudo was an academy founded in 1724 by Osaka merchants. It contributed to the development of education and business morality for the remaining 140 years of the Edo period, playing an important role in education in Osaka as a civic and liberal arts college.

1838 Tekijuku

Tekijuku was a private academy in Osaka founded in 1838 by OGATA Koan, a physician and renowned educator. Young minds from all over Japan gathered there to learn, and many of them later played leading roles in the modernization of Japan during the Meiji period.

1931 Osaka Imperial University

Osaka Imperial University was founded in 1931 with passionate support from the local government, the Kansai business community, and the citizens of Osaka as a citizen-led imperial university.

Celebrating the approval of Osaka Imperial University Foundation Plan by the House of Peers (March 1931, at Tokyo Station)

1949 Osaka University

2004 National University Corporation Osaka University

2007 Integration of Osaka University and Osaka University of Foreign Studies

Established originally as Osaka School of Foreign Languages in 1921, it was founded with the money donated to the government by an Osaka-based businesswoman who was passionate about establishing a "school capable of nurturing internationally-minded people in Osaka." Thus, Osaka School of Foreign Studies shares a similar background to that of Osaka University.

Our Commitment

Presently, universities are confronted with growing anticipation from society to cultivate talent and foster innovation in a major reorientation of social systems to tackle challenges such as the COVID-19 pandemic and pursuit of the SDGs and carbon neutrality.

In order to respond to these momentous changes in society, Osaka University has resolved to take a step beyond simply making "social contribution," and to pursue "social creation," specifically, to create a society where each member leads a meaningful and fulfilling life.

Inheriting our historical legacy, the university remains deeply rooted in the Osaka region, while valuing its relationship with the free and unfettered civic society of Osaka and nurturing the spirit of a "university in society, university for society."

With this vision, Osaka University will contribute to the achievement of the SDGs and the promise of leaving no one behind.

Strategic Partnerships to Challenge Global Issues

Global Knowledge Partners

Osaka University explores deeper routes of collaboration through joint research and education with our Global Knowledge Partners and four of our Overseas Centers to approach global issues, synergize through discovery across all fields of academia, and make an impact on resolutions to those issues worldwide.

Seeking Solutions to Social Challenges Worldwide

Comprehensive Cooperation between Institutions

Cross-domain joint research	Admit/dispatch young academic researchers	Joint educational programs
International industry-university collaboration	Cross-appointments	Mutual liaison offices

Outcomes since 2017

ASEAN Campuses

Osaka University established Osaka University ASEAN Campuses in cooperation with universities and institutions in the region. Together with the ASEAN region, we will carry and nurture the next generation of global individuals, and to move forward in our mission to contribute to the quality growth of the ASEAN region, Osaka University will implement international co-creation platforms with local and Japanese businesses in each country holding one of our ASEAN Campuses.
