

2018 APRU Global Health Conference

参加報告書 (Participation Report)

日にち/ Date : 28/Nov/2018

所属/ Affiliation : Graduate School of Medicine – Public Health

出張期間 (Period of trip)	26-31 October 2018
開催期間 (Period of Program)	28-30 October 2018
開催場所 (Place)	Faculty of Medicine University of Malaya, Kuala Lumpur, Malaysia
開催規模 (Scale)	参加国数(Number of participating countries) 16 参加者数(Number of participants) 306
プログラムの 背景・目的 (Background and the objective of the meeting)	<p>APRU (Association of Pacific Rim Universities) is an independent, self-governing association registered in Hong Kong. Member universities are represented in APRU by their president and board of members who meet annually.</p> <p>The APRU Global Health Program aims to leverage the global health education and research of Asia-Pacific universities to address global health issues through interaction with public policy and media. Since its launch in 2007, the program has covered a significant range of topics including emerging public health threats, ageing and chronic diseases, infectious diseases and health security issues. It has engaged academics, policy leaders, media specialists and communities on non-communicable diseases and on global health issues on campus. To intensify communication and coordination in global health, The 12th APRU Global Health Conference brings together leaders, researchers, and policy-makers to exchange ideas and collaborate on effective solutions to the challenges of our planetary health</p>

所 感
(Feedback on the
Program)

The 12th APRU Global Health Conference is co-organized by University of Malaya, the Faculty of Medicine, Department of Social & Preventive Medicine. The conference theme was “Planetary Health the next frontier”. This conference had 3 special panels: “Global Health in the Era of the 4th Industrial Revolution “, “Human Rights and Planetary Health”, and: Two emerging Global Health challenges: climate change and mental disorders”. During my participation in the conference, it allowed me to work in a group with Dr. Mellissa, the director of APRU global health program as a graduate researcher. In our group we discussed challenges and aspect of education and academic practice in the Pacific Rim area. This was a great opportunity for university leaders, academic developers, researchers and student representatives to debate the challenges, dilemmas and possibilities for transforming feedback processes at a fundamental level. Throught the participation and discussion with keynote speakers and participants, I deeply think that the proposals for this session, evaluating the innovative practice or practitioner is demanding. During this conference, I submitted a topic -- to attract students to global health, had beneficial discussion and gathered verity opinions from audiences, which help me to polish my research project. The field trips provided many memorable moments with other students. Associate professor Dr. Sanjay Rampal and his department, social medicine, our host and event coordinators, were especially welcoming and kind. They made the activity even greater than anticipated. I would like to express my gratitude to Osaka university as it gave a precious opportunity to help all students and researchers, including me, to gain a wealth of knowledge, friendships, and network over the course of the conference. Also I would like to thank Professor Iso whom gave me this golden opportunity to do this wonderful project on the topic Global Health, which also helped me in answering a lot of questions. Lastly, I would also like to thank my instructors and friends who helped me a lot in this conference and made it fruitful to me.
