

This Month's Discussion Topic:

1/16 Seminar

When Does a Child Die? -Difficult Choices in Organ Donation-

Interactive Seminar
Brainstorming & Creative Discussion in English
Led by Professor John Ino
Professor Emeritus,
University of California San Francisco

In the past when someone suffers from "brain death", the condition was called a "coma". They can't think, move, or react to external stimulus. However, their heart still beats.

In many countries "brain dead" people are often organ donors. A "brain dead" child will still be warm to touch, and grow taller in this state. Is this child still "alive"? What if their organs could save another child's life?

Monday, January 16 1:30pm ~ 4:40pm

Where: 7F Lecture Room, Interdisciplinary Research Building

Toyonaka Campus

Open to: All Osaka University students
Contact: UC Osaka Office for any enquiries

Tel: 06-6850-6785

UC Osaka Office Special Lecture: This special English lecture series is being conducted in an interactive seminar-style, based on group discussions about familiar topics. Participants consider things from multiple viewpoints, critically and pleasantly, through stakeholder analysis in order to develop logical thinking ability and communication skills.

Is this your first time to join the lecture? Don't worry! All welcome!
