

**Kasetsart University Sriracha Campus Research Grants**  
**for ASEAN+6 and European Graduate Students, Researchers, and Lecturers**  
**Year 2025**

---

**Rationale:**

Currently, the competition rate between Thai universities has increased due to the declining birth rate of the Thai population. This trend is evident from the birth rate data from 2013 - 2022, provided by The Bureau of Registration Administration (BORA), Department of Provincial Administration (DoPA) (accessed on January 24, 2025, online), resulting in a decrease in the number of students entering university. Therefore, Thai universities must adapt and elevate their standards to be recognized on the international stage, building credibility and attracting students, as well as international organizations interested in academic and research collaborations with the university.

One way to elevate these standards is by meeting the global standards of the World University Ranking and producing research that is published internationally. Sriracha Campus has recognized the importance of this issue. To align with Kasetsart University's international development policy, Sriracha Campus initiated the "Kasetsart University Sriracha Campus Research Grants for ASEAN+6 and European Graduate Students, Researchers, and Lecturers Year 2025" in 2023 and 2024 and will continue the project in 2025. The aim is to increase the number of international personnel and research, aligning with the World University Ranking's "internationalization" criteria. This is to support the university in increasing its ranking based on these criteria, enhancing the visibility of Kasetsart University and Sriracha Campus on the international stage through the World University Ranking and internationally published research. Furthermore, this aims to create an international atmosphere at Sriracha Campus and foster good relations between partner higher education institutions and Kasetsart University for future collaborations.
